RELEVANT EXPERIENCE

Dr. Nelson is an algorithm scientist in the JPL Radiation Sciences group and on the Orbiting Carbon Observatory-2 and -3 (OCO-2/3) Science Teams. He spent his graduate career and postdoctoral fellowship investigating ways to improve the accuracy and precision of near-infrared carbon dioxide retrievals from space-based instruments, with a focus on the impact of clouds and aerosols. His research objectives include improving atmospheric gas and aerosol retrieval algorithms, detecting and quantifying small-scale greenhouse gas sources, and developing novel products from space-based measurements. He is the algorithm lead for both OCO-2 and OCO-3 and helped lead the development of versions 10 and 11 of the OCO-2/3 ACOS XCO₂ retrieval algorithm.
