

Alexander L. Handwerger

Assistant Researcher, Step II
Jet Propulsion Laboratory
MS 300-323
4800 Oak Grove Drive
Pasadena, CA 91109

Email: alexander.handwerger@jpl.nasa.gov
alhandwerger@g.ucla.edu

Professional Appointments

Joint Institute for Regional Earth System Science and Engineering, University of California, Los Angeles and Jet Propulsion Laboratory, California Institute of Technology
Assistant Researcher, Step II, 07/2021–Present, *Assistant Researcher, Step I*, 01/2020–06/2021
Visiting Assistant Researcher, 10/2019–12/2019

Using satellite and airborne interferometric synthetic aperture radar (InSAR) and other remote sensing data to investigate the kinematic behaviors of landslides and rock glaciers in response to ongoing climate shifts, search for kinematic patterns to identify changes in landslide stability regimes, inventory active rock glaciers and quantify their potential as a water resource, create open-access remote sensing tools to enable rapid response to natural hazards, develop and test mechanical-hydrologic models that can describe various landslide and rock glacier behaviors. Co-advisor for three undergraduate students, one masters student, and three PhD students.

Jet Propulsion Laboratory, California Institute of Technology
NASA Postdoctoral Program Fellow, 10/2016–10/2019

Used satellite and airborne InSAR and pixel offset tracking with SAR and to quantify spatio-temporal patterns of landslide motion in response to changes in environmental conditions. This work was under the guidance of Dr. Eric Fielding.

University of Edinburgh
Visiting Scientist, 09/2015–09/2016

Developed project to detect the early warning signs of catastrophic landslide failure using satellite InSAR. This work was with Dr. Simon Mudd, Dr. Noel Gourmelen, and Dr. Andrew Bell.

University of Oregon
Postdoctoral Research Associate, 07/2015–12/2015

Developed numerical models to understand interactions between climate change, hydrate dissociation, and submarine landslides. This work was under the guidance of Dr. Alan Rempel.

University of Oregon
Graduate Student Researcher, 09/2009–06/2015

Used satellite InSAR and high resolution topographic data to identify active slow-moving landslides, quantify their kinematics over seasonal and yearly timescales, and develop mechanical models that can predict landslide motion. This work was under the guidance of Dr. Joshua Roering, Dr. David Schmidt, and Dr. Alan Rempel.

Boston University
Undergraduate Research Assistant, 09/2007–05/2008

Examined how deltas are organized to uniformly redistribute the tidal prism along the distributaries of the delta system. Analyzed Landsat remote sensing images of the Brahmaputra-Ganges delta, Niger delta, Irrawaddy delta, Mekong delta, and Indus delta. This work was under the guidance of Dr. Sergio Fagherazzi.

Education

Ph.D. Geological Sciences, University of Oregon, 2015

Advised by Dr. Joshua Roering, Dr. David Schmidt, and Dr. Alan Rempel

Area of Study: Landslides, InSAR, Gas Hydrates

Dissertation: *Controls on the Kinematics of Slow-moving Landslides from Satellite Radar Interferometry and Mechanical Modeling*

B.A. Earth Sciences *cum laude*, Boston University, 2008

Advised by Dr. Sergio Fagherazzi

Directed study: *Morphology of distributary channels in tidal deltas*

Geology Field School in Ireland, James Madison University, 2008

Study Abroad Program, University of Auckland, New Zealand, 2007

Research Interests

Landslides mechanics and hydrology, radar interferometry (InSAR), remote sensing, natural hazards, mechanical modelling, quantitative geomorphology, fault and glacier mechanics, gas hydrates and submarine landslides.

Awards

NASA Postdoctoral Program Fellowship, 2016-2019

Johnston Scholarship Travel Grant, University of Oregon Department of Geological Sciences, 2011, 2013, 2014

Grants

Pending Proposals

“Quantifying the Rate and Magnitude of Rock Glacier Motion and Melt in the Upper Colorado River Basin”, **NASA: A.34 Earth Science Applications: Water Resources**, 2022-2025, \$447,620. Co-I with PI Matthew Morriss (U.S. Geological Survey) and Co-I John Solder (U.S. Geological Survey).

Funded Proposals

“Water from Stone – Investigating the Hydrologic Role of Rock Glaciers”, **NSF: Hydrologic Sciences**, 2020-2023, \$337,649. Co-PI with PI Jeffrey Munroe (Middlebury College).

“Evaluating Landslide State with Combination of S- and L-band SAR for Soil Moisture Measurements”, **NASA: Utilization of Airborne L- and S- Band Synthetic Aperture Radar Imagery over North America - Joint NASA and ISRO Airborne Campaign**, 2020-2021, \$100,001. Co-I with PI Eric Fielding (Jet Propulsion Laboratory) and Co-I Seung-Bum Kim (Jet Propulsion Laboratory).

“Defining precursors of ground failure: a multiscale framework for early landslide prediction through geomechanics and remote sensing”, **NSF: Prediction of and Resilience against Extreme Events (PREEVENTS)**, 2019-2023, \$1,400,000. Co-PI with PI Giuseppe Buscarnera (Northwestern University), Co-PI Daniel Horton (Northwestern University), and Co-PI Karen Daniels (North Carolina State University).

“Landslide Kinematics in Response to Ongoing Climate Shifts”, **NASA: Earth Surface and Interior**, 2019-2021, \$681,211. Science PI with PI Eric Fielding (Jet Propulsion Laboratory), Collaborator William Schulz (US Geological Survey).

“Environmental Controls on Landslide Motion Revealed by InSAR and Pixel Offset Tracking”, **NASA: Earth Surface and Interior**, 2016-2019, \$878,430. Co-I with PI Eric Fielding (Jet Propulsion Laboratory), Co-I Roland Bürgmann (University of California Berkeley), Co-I Jeffery Coe (US Geological Survey), Collaborator William Schulz (US Geological Survey).

Invited Talks

The Geological Society of Washington, USA, 2021

University of California, Santa Barbara, USA, 2021

USGS Landslide Hazards Program, USA, 2021

Dartmouth College, USA, 2020

Northwestern University, USA, 2019

McGill University, Canada, 2019

University of California, Santa Cruz, USA, 2018

University of Strasbourg, France, 2018

California State University, Long Beach, USA, 2018

Portland State University, USA, 2017

Northern Arizona University, USA, 2017

Middlebury College, USA, 2017

University of Bologna, Italy, 2016

University of Edinburgh, UK, 2015

Students Advised

Sophia Winter (undergraduate, University of California, Los Angeles)

Xiang Li (Ph.D. Candidate, Northwestern University, co-advised)

Alexandra Urgilez Vinueza (Ph.D. Candidate, Delft University, co-advised)

Camryn Kluetmeier (undergraduate, Middlebury College, co-advised)

Nicola Dal Seno (MS, University of Genova, 2020, co-advised)

George Quinn Brencher (undergraduate, Middlebury College, 2020, co-advised)

Conference Presentations

Teaching Experience

Graduate Teaching Fellow, University of Oregon (2009–2015)

Taught labs and gave lectures for Tectonic Geomorphology and Landscape Evolution (Geol 410/510), Surveying (Geol 410/510), Oregon and Pacific Northwest Geology (Geol 308), Geology of National Parks (Geol 213), Evolving Earth (Geol 103), Earth's Dynamic Interior (Geol 101).

Professional Activities

Publications reviewed for: *Journal of Geophysical Research – Earth Surface*, *Geophysical Research Letters*, *Scientific Reports*, *Geomorphology*, *Remote Sensing of Environment*, *Remote Sensing*, *Geosciences*, *Geophysical Journal International*, *Natural Hazards and Earth System Sciences*, *Hydrology and Earth System Sciences*.

Proposals reviewed for: NSF - Geomorphology and Land-use Dynamics.

Guest Editor (with Estelle Chaussard, Pietro Milillo, and H el ene Le M evel) for a Special Issue of *Remote Sensing* entitled "SAR for Natural Hazards".

Member of the Committee on Earth Observation Satellites (CEOS) Landslide Pilot, American Geophysical Union (AGU), and European Geosciences Union (EGU).

Skills

Computational:

Extensive experience programming and numerical modeling in MATLAB. InSAR processing with InSAR Scientific Computing Environment (ISCE) and Repeat Orbit Interferometry PACkag (ROI PAC) and time series processing with Generic InSAR Analysis Toolbox (GIANt) and the Miami INsar Time-series software in PYthon (MintPy). Experience with Python, UNIX, Perl. Mapping and analysis with QGIS, ArcGIS, Google Earth and Google Earth Engine, and MATLAB. Advanced ability with productivity software including LaTeX, Microsoft Office, Adobe Creative Suite.

Field experience:

Identified active landslides for instrumentation. Assisted with installation of piezometers, extensometers, pressure gauges, and a weather station in a slow-moving landslide in Northern California (2013).

Trained to use GAMMA's ground-based radar interferometer (GBRI) and able to run surveying equipment (total station and level).

Produced geologic maps in Western Ireland as part of James Madison University's field school (2008)
