Reinier Janssen

Personal Details

Name	Reinier Maarten Johannes Janssen
Address	NASA Jet Propulsion Lab 4800 Oak Grove Drive MS: 169-532 Pasadena, CA 91109 United States of America
Mobile Phone	+1 (818) 928 9305
Email	reinier.m.janssen@jpl.nasa.gov

Education

2011 - 2017	Ph.D. Research, Delft, University of Technology Subject: Multiwavelength observations of Active Galactic Nuclei: Using current facilities and development of enabling technologies. Promotors: prof.dr.ir. TM Klapwijk, prof. dr. HJA Röttgering, dr.ir. J.J.A. Baselmans
2008 - 2011	MSc Astronomy, Leiden University Graduation Subject: Host Galaxies of Radio-loud Active Galactic Nuclei
2006 - 2011	MSc Applied Physics (cum laude), Delft, University of Technology Graduation Subject: Submicron Kinetic Inductance Detectors for SAFARI

Employment

2019 - now	NASA Postdoctoral Fellow <i>NASA Jet Propulsion Lab, Pasadena, United States</i> Development of Kinetic Inductance detectors for THz spectrometry with astronomical applications
2017 - 2018	Postdoctoral researcher <i>Institut d'Astrophysique Spatiale, Université Paris Sud (Paris XI), Paris, France</i> Research subjects: <ul style="list-style-type: none">• Interaction between high-energy particles and cryogenic detectors for next-generation astronomical space mission• Nature of jet-mode active galactic nuclei in actively star-forming galaxies
2011 - 2017	Ph.D. Research, <i>Kavli Institute of NanoScience, Faculty of Applied Sciences, Delft University of Technology, The Netherlands</i> Research subjects: <ul style="list-style-type: none">• Development of hybrid NbTiN-Al Kinetic Inductance Detectors for astronomical applications• Properties of radio-loud active galactic nuclei in the local universe
2007 - 2009	Suspension Engineer <i>DUTracing, Delft, The Netherlands</i> In parallel with my double master's degree I have participated in this student project to build a formula style racecar and compete in prestigious international competitions in Germany and the UK.

Honors and Awards

- NASA Postdoctoral Program Fellowship, Universities Space Research Association (2018)
- Best Poster Award – JPL Postdoc Research Day (2021)

Teaching Experience

- Guest lecture on “AGN and the Cosmological Distance ladder” at Pasadena City College as part of the CalTech-PCC Connection program (2019).
- Teaching assistant for the course “Introduction to Astronomy” during which I assisted in the complete redevelopment of the course. In addition, a TUD Grassroots proposal was successfully completed during the second year of the course. (2013, 2014)
- Supervisor of the final project for first year students (2013, 2014).
- Supervised 1 BSc student (2014) and 4 JPL summer students (2020)
- Advisor for students of the Astronomy Minor program (6 students)
- (Co-)supervisor of 4 graduate students

Public Outreach

- Outreach lecture “The Hidden Universe in 3D” for Astronomy on Tap series (Spring 2020)
- Co-organizer and volunteer for the Stargazing and Lecture series of the CalTech Astronomy Outreach program (Fall 2019)
- Outreach lecture “Seeing the Unseen” during CalTech Science for March (March 2019)
- Six invited lectures on the subjects “light” and “stars” at the Delftse Natuurwacht for children age 8-16. (2014-2017)
- Invited lecture titled “Shining a light on the dark part of the universe” for ~20 international high-school students of the International School of The Hague as part of the Challenger Program (April 2014)
- Invited article “Rood licht leidt naar oerklar” for the “Vraag het TU Delft” series of the Telegraaf (August 2013)
- Invited article on “Actieve Galactische Kernen: Monsters in het Universum” for De Physicus (January 2015)

Awarded proposals for telescope observations

- “Unraveling the nature of jet-mode AGN in galaxies with active star formation” for a total of 198 hours of observation time on the IRAM 30m telescope (2018,2019)
- “Unraveling the nature of jet-mode AGN in galaxies with active star formation” for a total of 5.5 hours of observation time on the Very Large Telescope (2019)
- “Exploring the limits of AGN feedback in low-power radio galaxies” for a total of 9 nights of observation time on the Isaac Newton Telescope (2019)
- “The ultimate test of a classic paradigm in astronomy: only massive ellipticals host powerful radio sources” For a total of 6 nights of observation time on the William Herschel Telescope (2013, 2014)
